SKILLS

Frontend — React | JavaScript | Typescript | Html5 | Css3 | Bootstrap | Tailwind, **Backend** — Java | REST API, **Tools** — Git | Visual Studio, **Methodologies** — Scrum | Agile Practices, **Fundamentals** — Data Structures and Algorithms | SQL | OOPS concepts

MAJOR PROJECTS

Financial Dashboard 📄

Tech Stack: React (Vite), JavaScript, Tailwind CSS, Zustand

Built a finance tracking system to manage transactions, balances, and spending insights with interactive visualizations and Zustand based state management.

AI Decision Engine 📄

Tech Stack: React (Vite), Tailwind CSS, JavaScript

Built a decision-support system that generates psychology-driven recommendations from user inputs with a scalable AI-ready architecture.

Users Dashboard – React CRUD Application 📄

Tech Stack: React (Vite), Tailwind CSS, JavaScript, REST

Developed a CRUD-based dashboard with search, pagination, and API integration for efficient user data management.

Stop Before Zero - Mobile & Web Gaming App 📄

Tech stack: React.js, JavaScript, and CSS

Created a timer game where users stop the timer close to a target time.

Drag & Drop Notes Web App 📄

Tech stack: React, Tailwind CSS, and TypeScript

Created sticky notes web app, enabling users to add and move notes through drag-and-drop interactions.

News Monkey Web App 📄

Tech stack: React Js

A news website that fetches and displays latest news headlines by integrating live news APIs.

Investment Calculator App 📄

Built a responsive investment calculator that computes real-time compound returns and displays year-wise investment insights.
