## PROFESSIONAL SUMMARY

Software Developer Intern with hands-on experience building and shipping real-world applications using React, REST APIs, and backend services. Strong understanding of APIs, debugging, and system design, with growing expertise in backend development using Java and modern tooling. Passionate about experimenting with new technologies, including AI-assisted development workflows, and building impactful products.

## EDUCATION

## PROJECTS

### Financial Dashboard

- Built a finance tracking system using React.js with modular architecture.
- Designed frontend to integrate with REST APIs for transaction management.
- Implemented state management and dynamic data visualization.

### User Dashboard – CRUD Application

- Developed a REST-based CRUD system with search and pagination.
- Designed scalable frontend architecture supporting API integration.

### AI Decision Engine

- Created a scalable system capable of handling structured user inputs.
- Designed architecture aligned with future backend and API expansion.

## TECHNICAL SKILLS

**Languages:** Java, JavaScript, TypeScript, SQL

**Frontend:** React.js, HTML5, CSS3, Tailwind, Bootstrap

**Backend:** REST APIs, Core Java, Spring Boot (familiar), API Design

**Tools & Methodologies:** GitHub, VS Code , Vercel, Agile, Scrum, Cursor AI

**Fundamentals:** Data Structures & Algorithms, OOP, MySQL / SQL
